

Work in progress

Non fonctionnel: le replace ne supprime pas l'ancienne balise div

```
<data>
  <xpath expr="//div[@class='o_label_name']" position="replace">
    <div class="o_label_name" style="font-size:12px;line-
height: 100%;background-color: transparent;padding-top: 1px;">
      <span t-if="product.is_product_variant" t-
field="product.display_name"/>
      <span t-else="" t-field="product.name"/>
    </div>
  </xpath>
</data>
```
