

GLPI Agent Linux

Version rapide: prendre la version appimage

```
glpi-agent*.Appimage --install --local . --no-service
```

```
/usr/local/bin/glpi-inventory --json > nom_du_fichier
```

GLPI Agent Linux - version Ugo

```
wget https://github.com/glpi-project/glpi-agent/releases/download/1.7.2/glpi-agent-1.7.2-linux-installer.pl
chmod +x glpi-agent-1.7.2-linux-installer.pl && ./glpi-agent-1.7.2-linux-installer.pl
```

```
nano /etc/glpi-agent/conf.d/00-install.cf
```

Et modifier

[00-install.cf](#)

```
_server = https://srv-glpi.tpcontrol.lan/front/inventory.php,
https://makeitsimple.be/front/inventory.php
tag = CHANGE_MOI
no-ssl-check = 1_
```
