

```
git init
git config --global init.defaultBranch main
#git branch -M main
git remote add origin git@github.com:xxxxx
git add -A
git commit -am "Initial upload"
git push origin main
```

Cloner une branche en particulier

```
git clone -b uat git@github.com:makeitsimple-git/mrp_timac.git
docker_volume/odoo/addons/17.0/mrp_timac/
```

Pousser des branches vers des autres

Exemple: migrer la branche vincent vers uat

```
git push origin vincent:uat
```
