

Linux: Mises à jours automatiques (unattended-upgrades)

Configuration

1. Installer les paquets nécessaires

```
install unattended-upgrades apt-listchanges
```

2. Vérifier la configuration:

```
nano /etc/apt/apt.conf.d/20auto-upgrades
```

Il faut vérifier la présence de ces deux lignes:

```
APT::Periodic::Update-Package-Lists "1";  
APT::Periodic::Unattended-Upgrade "1";
```
