

Zabbix: Eventlog

Créer un élément avec la clé eventlog[Application,,"Warning|Error"] pour un Agent Zabbix Active.
Type d'information Journal

The screenshot shows the Zabbix web interface for creating a new item. The left sidebar contains the navigation menu with categories like Surveillance, Services, Inventaire, Rapports, Configuration, and Administration. The main panel is titled 'Éléments' and shows a list of existing items. The configuration form for a new item is displayed, with the following fields:

- Nom:** LogsVincent
- Type:** agent Zabbix (actif)
- Clé:** eventlog[Application,,"Warning|Error"] (with a 'Sélectionner' button)
- Type d'information:** Journal
- Intervalle d'actualisation:** 1m
- Intervalle personnalisé:** A table with columns Type, Intervalle, Période, and Action. The 'Planification' type is selected with an interval of 50s and a period of 1-7,00:00-24:00. There is an 'Ajouter' button and a 'Supprimer' button.
- Période de stockage de l'historique:** Ne pas conserver l'historique (selected) and Période de stockage: 15d
- Format de l'horodatage du journal:** (empty field)
- Description:** (empty text area)
- Activé:** ☒
- Dernières données:** A row of buttons: Actualiser, Clone, Exécuter maintenant, Test, Effacer l'historique et les tendances, Supprimer, and Annuler.
