

désinstaller les modules non-officiels fermer le serveur faire un backup

```
installer le package entreprise  
su postgres -s /bin/bash
```

Lancer la commande de maj

```
apt install rsync  
  
su postgres -s /bin/bash  
cd /tmp  
# Changer test  
python3 <(curl -s https://upgrade.odoo.com/upgrade) test -d klinicare -t  
16.0 --contract xxxxxx
```

/var/lib/odoo/.local/share/Odoo/filestore/klinicare/

klinicare\_test\_16.0\_2024\_09\_02\_18\_10

When performing database restoration via the command line, ensure you have correctly placed the filestore. The database name and filestore name should match to ensure Odoo uses the same filestore rather than generating a new one. The filestore in Odoo is stored in /home/odoo/.local/share/Odoo/filestore (assuming /home/odoo is Odoo's home directory).

```
ALTER DATABASE "klinicare_test_16.0_2024_09_02_18_10" OWNER TO odoo;
```

```
SELECT format(  
    'ALTER TABLE public.%I OWNER TO odoo',  
    table_name  
)  
FROM information_schema.tables  
WHERE table_schema = 'public'  
    AND table_type = 'BASE TABLE' \gexec
```

```
drop sequence base_cache_signaling;
```
