

Install Odoo 19 Debian 13

```
apt-get install -y xfonts-75dpi xfonts-base
wget
https://github.com/wkhtmltopdf/packaging/releases/download/0.12.6.1-3/wkhtml
tox_0.12.6.1-3.bookworm_amd64.deb
apt install ./wkhtmltox_0.12.6.1-3.bookworm_amd64.deb
```

Install ancienne version

```
apt-get install -y xfonts-75dpi xfonts-base
wget
https://github.com/wkhtmltopdf/packaging/releases/download/0.12.6-1/wkhtmlto
x_0.12.6-1.buster_amd64.deb
dpkg -i wkhtmltox_0.12.6-1.buster_amd64.deb
```

Report Url à configurer

Dans technique - paramètres systèmes ajouter une clé "report.url" renvoyant vers l'adresse hors reverse proxy de l'hôte. Ex: <http://10.20.52.101:8069>

PDF generation too long and faulty on Odoo12 - solution!

1) Go to the Backend part of your Odoo12 and activate the developer mode. 2) Go to the "Configuration" section. Then the "Technical" tab and click on "System Settings" at the bottom of the drop-down menu. 3) Click on the "Create" button 4) In the "Key" field, put "report.url" and in the "Value" field, "<http://0.0.0.0:8069>". Then save. 5) Re-click the "Create" button 6) In the "Key" field, put "web.base.url.freeze" and in the "Value" field, "True". Then save. 7) Go to the terminal of your Odoo 12 server 8) Start this command "service odoo restart" 9) Test the PDF generation of Odoo 12. (by printing an article, an estimate or an invoice ...)
