

OPNSense: Dual Wan

Configuration

The screenshot shows the OPNSense configuration interface for a single gateway. The left sidebar contains a navigation menu with categories like System, Interfaces, Firewall, VPN, Services, Power, and Help. The main content area is titled "System: Gateways: Single" and contains a form for editing a gateway. The form includes fields for Name (WANFIX_DHCP), Description (Interface WANFIX_DHCP Gateway), Interface (WANVOO), Address Family (IPv4), IP address (dynamic), Upstream Gateway, Far Gateway, Disable Gateway Monitoring, Monitor IP (8.8.8.8), Mark Gateway as Down, Priority (175), and an Advanced section. At the bottom of the form are "Save" and "Cancel" buttons.

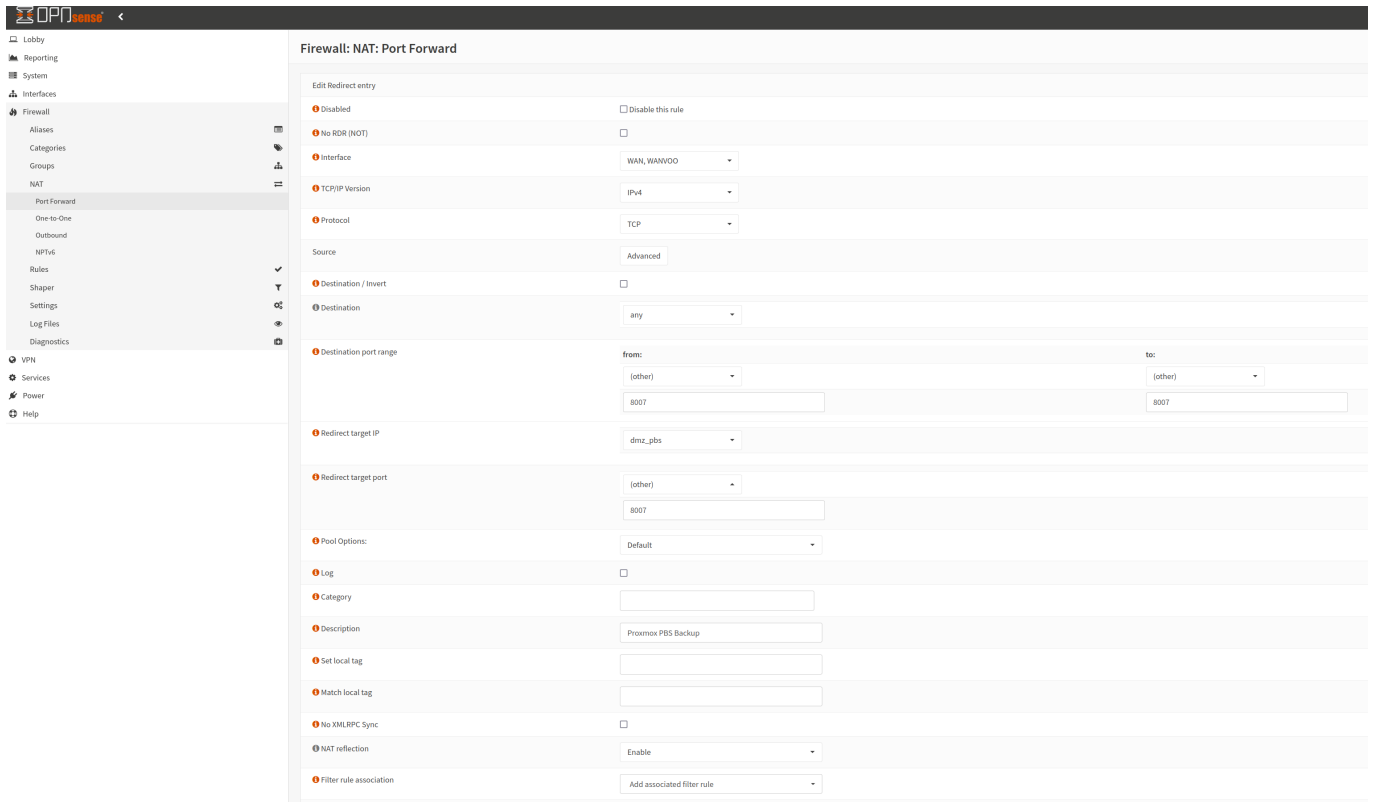

Plus la priorité a une faible valeur, plus elle est prioritaire

The screenshot shows the OPNSense configuration interface for a gateway group. The left sidebar is the same as in the previous screenshot. The main content area is titled "System: Gateways: Group" and contains a form for editing a gateway group. The form includes fields for Group Name (Group), Gateway Priority (a table with columns Gateway, Tier, and Description), Trigger Level (Member Down), and Description. The table for Gateway Priority is as follows:

Gateway	Tier	Description
WANFIX_DHCP	Tier 2	Interface WANFIX_DHCP Gateway
WAN_PPPOE	Tier 3	Interface WAN_PPPOE Gateway

At the bottom of the form are "Save" and "Cancel" buttons.

Port forwarding

Filter rule association → Add associated filter rules va créer une règle firewall sur l'interface floating

Le port forwarding ne marche plus sur la gateway de secours

Activer l'option ci-dessous si lorsque le premier lien tombe, le port forwarding ne marche plus.

The screenshot shows the OPNSense configuration interface. At the top, a message states "The changes have been applied successfully." The left sidebar contains a navigation menu with categories like System, Reporting, Interfaces, Firewall, VPN, Services, Power, and Help. The main content area is divided into sections: System, Trust, and Networking. The System section includes fields for Hostname, Domain, Time zone (set to Europe/Brussels), Language (set to English), and Theme (set to opnsense). The Trust section has a checkbox for "Store intermediate" which is unchecked. The Networking section includes a checkbox for "Prefer IPv4 over IPv6" which is checked, and a table for "DNS servers" with columns for "DNS Server" and "Use gateway". The "Gateway switching" section has a checkbox for "Allow default gateway switching" which is checked and highlighted with a red box. A "Save" button is located at the bottom of the configuration area.
