

Proxmox, monter un dossier dans un container

1. Créer le dossier monter

```
mkdir /mnt/olddisk  
mount /dev/sdb1 /mnt/olddisk/ -o umask=000
```

1. Adapter la configuration du container:

```
nano /etc/pve/lxc/100.conf
```

100.conf

```
...  
mp0: /mnt/olddisk,mp=/srv/olddisk  
...
```
