

# Proxmox: Remplacement de LVM par ZFS

```
umount /var/lib/vz

lvremove /dev/vg/data

mdadm --stop /dev/md4
mdadm --remove /dev/md4
mdadm --zero-superblock /dev/sd[abcd]4

#retirer les anciens montages
nano /etc/fstab

zpool create -f -o ashift=12 zfspool raidz /dev/sda4 /dev/sdb4 /dev/sdc4
/dev/sdd4

zpool list
zfs list

zfs create zfspool/vz
zfs set mountpoint=/var/lib/vz zfspool/vz
zfs mount -a
```
