

Share Samba sur Proxmox

1. Installer samba:

```
apt install samba
```

2. Editer le fichier smb.conf

```
nano /etc/samba/smb.conf
```

1. Supprimer tout ce qui se trouve après [home]
2. coller ceci à la place

smb.conf

```
[PROXMOX]
comment = Proxmox Technical Directory
path = /var/lib/vz/dump
browseable = yes
writeable = yes
read only = no
create mask = 0644
directory mask = 0755
```

1. Activer les services

```
systemctl unmask samba
systemctl enable samba
systemctl start samba
```

2. Définir un mot de passe pour l'utilisateur root

```
smbpasswd -a root
```
