

# OpenSense: LDAP

The screenshot shows the OpenSense web interface for configuring an LDAP server. The left sidebar contains a navigation menu with categories like Reporting, System, Servers, Configuration, Gateways, High Availability, Routes, Settings, Trust, Wizard, Log Files, and Diagnostics. The 'System' category is expanded, and 'Servers' is selected. The main content area is titled 'System: Access: Servers' and displays the configuration for a server named 'Server-AD'. The configuration fields include:

- Descriptive name: Server-AD
- Type: LDAP
- Hostname or IP address: dc1
- Port value: 636
- Transport: SSL - Encrypted
- Protocol version: 3
- Bind credentials: User DN: CN=srv-gateway,ou=...,DC=...,DC=lan; Password: [masked]
- Search scope: Entire Subtree
- Base DN: DC=...,DC=lan
- Authentication containers: OU=...,S,DC=...,DC=lan
- Extended Query: [empty]
- User naming attribute: sAMAccountName
- Read properties: [checkbox]
- Synchronize groups: [checkbox]
- Limit groups: Nothing selected

A 'Save' button is located at the bottom of the configuration form.
