

```
service mysql stop  
  
mysqld --skip-grant-tables --skip-networking --user=mysql  
  
mysql -u root
```

```
FLUSH PRIVILEGES;  
SET PASSWORD FOR root@'localhost' = 'new_password_goes_here';  
FLUSH_PRIVILEGES;
```

ceci peut aussi aider `sudo mkdir /var/run/mysqld sudo chown mysql:mysql /var/run/mysqld`
